6.1.2 Permanent Tissues

The cells of the permanent tissues do not generally divide further. Permanent tissues having all cells similar in structure and function are called **simple tissues**. Permanent tissues having many different types of cells are called **complex tissues**.

6.1.2.1 Simple Tissues

A simple tissue is made of only one type of cells. The various simple tissues in plants are parenchyma, collenchyma and sclerenchyma (Figure 6.2). **Parenchyma** forms the major component within organs. The cells of the parenchyma are generally isodiametric. They may be spherical, oval, round, polygonal or elongated in shape. Their walls are thin and made up of cellulose. They may either be closely packed or have small intercellular spaces. The parenchyma performs various functions like photosynthesis, storage, secretion.

The **collenchyma** occurs in layers below the epidermis in dicotyledonous plants. It is found either as a homogeneous layer or in patches. It consists of cells which are much thickened at the corners due to a deposition of cellulose, hemicellulose and pectin. Collenchymatous cells may be oval, spherical or polygonal and often contain chloroplasts. These cells assimilate food when they contain chloroplasts. Intercellular spaces are absent. They provide mechanical support to the growing parts of the plant such as young stem and petiole of a leaf.

Sclerenchyma consists of long, narrow cells with thick and lignified cell walls having a few or numerous pits. They are usually dead and without protoplasts. On the basis of variation in form, structure, origin and development, sclerenchyma may be either fibres or sclereids. The **fibres** are thick-walled, elongated and pointed cells, generally occurring in groups, in various parts of the plant. The **sclereids** are spherical, oval or cylindrical, highly thickened dead cells with very

सूरदास का जन्म सन् 1478 में माना जाता है। एक मान्यता के अनुसार उनका जन्म मधुग के निकट रुनकता या रेणुका क्षेत्र में हुआ जबकि दूसरी मान्यता के अनुसार उनका जन्म-स्थान दिल्ली के पास सीही माना जाता है। महाप्रभु बल्लभाचार्य के शिष्य सूरदास अष्टछाप के कवियों में सर्वाधिक प्रसिद्ध हैं। वे मधुग और वृंदावन के बीच गऊघाट पर रहते थे और श्रीनाथ जी के मंदिर में भजन-कीर्तन करते थे। सन् 1583 में पारसौली में उनका निधन हुआ।

उनके तीन ग्रंथों **सूरसागर**, **साहित्य लहरी** और **सूर सारावली** में **सूरसागर** ही सर्वाधिक लोकप्रिय हुआ। खेती और पशुपालन वाले भारतीय समाज का दैनिक अंतरंग चित्र और मनुष्य की स्वाभाविक वृत्तियों का चित्रण सूर की कविता में मिलता है। सूर 'वाससत्य' और 'शृंगार' के श्रेष्ठ कवि माने जाते हैं। कृष्ण और गोपियों का प्रेम सहज मानवीय प्रेम की प्रतिष्ठा करता है। सूर ने मानव प्रेम की गौरवगाथा के माध्यम से सामान्य मनुष्यों को हीनता बोध से मुक्त किया, उनमें जीने की ललक पैदा की।

उनकी कविता में ब्रजभाषा का निखरा हुआ रूप है। यह चली आ रही लोकगीतों की परंपरा की ही श्रेष्ठ कड़ी है।
