Since the 2022 Chevrolet Silverado EV will share an assembly line with 2022 Hummer EV, the two will probably share a PowerTrain. The Hummer will first appear as an electrical truck and later as a SUV. The new Ford F-150 Lightning 2022 shows many fascinating aspects absent in other electrical vehicles or F-150. Photo courtesy: [Trawl / iStock] Believe it or not, the electrical trucks are here. This means that one, two or three electrical engines will have, depending on the finish, with a combined power of 1000 horsepower. We hope that the truck goes on sale at the beginning of 2023, rivaling with the Ford F-150 Lightning of 2022 or the Hummer EV of 2022. In addition, the company stated that it was planned to launch the electrical trucks with battery and hybrids in the future. The cheapest version of the truck will be thrown later. If a power cut occurs at home, the battery of the truck can be duplicated as a source of energy up to 10 days. MÀ From Toyota to General Motors and Tesla to Ford, these big players in the automotive industry have dropped a huge amount of money on the Electric vehicles (EV). Statistics released by car maker Dearborn reveal that the next move will improve Ford's market share in the electric vehicle sector and will likely generate a large amount of revenue for the company. However, the exact delivery date, prices and fuel consumption standards have not yet been confirmed. What's more interesting is that the company has revealed that the structure of the truck is very useful for towing heavy loads. 2022 Ford F-150 Lightning EV Photo courtesy: [Emily Elconin/Bloomberg via Getty Images] According to the company, they've done more than enough. 160,000 reservations for the 2022 Ford F-150 Lightning. Owners can choose between a 300, 400 or 500 mile battery that ranges from 125 kWh to 250 kWh capacity. We expect the truck to go on sale in early 2022 with a payload of up to 5,000 pounds, which is relatively high. At a launch event in Shanghai, Toyota unveiled a new BZ sub-brand for electrified vehicles as it anticipated the electric-battery crossover expected to hit the market next year. However, you won't be able to drive trucks from any of these companies until at least the fall of 2022.
